

Extra Mile Stories

ESCOT-V made fuel-efficient driving both safe and comfortable.

ESCOT-V was developed to address the needs of customers. Delivering smoother driving than ever before, it ensures enhanced fuel efficiency. It also features Clutch-pedal operation which allows drivers to concentrate on the road.

ESCOT-V thus provides greater safety while significantly reducing driver fatigue.

Powerful support for fuel-efficient driving in all situations.

ESCOT-V's biggest feature is its automatic transmission with instantaneous auto-shifting to the optimal gear ratio. It means anyone can minimize fuel usage like a veteran driver. The adoption of other innovations to heighten combustion efficiency also leads to better fuel savings.

Economy E-D Mode for fuel-saving performance by anyone.

ESCOT-V's Economy E-D mode activates a skip shifting and/or low engine shifting to bring about both superior fuel efficiency and smooth driving. To maximise fuel efficiency, acceleration is kept below a certain level even if the accelerator is floored.

Auto cruise control for relaxed driving.

While using ESCOT-V's auto cruise system, the Economy E-D Mode can be turned on with the press of a button to achieve both comfortable driving and reduced fuel usage. ESCOT-V will automatically regulate gear-change timing and uphill acceleration for optimum fuel efficiency.

ESCOT Roll suppresses fuel consumption when coasting.

ESCOT-V is equipped with ESCOT Roll which disengages the engine brake when coasting. Rather than burning fuel, the truck's own mass is used to prevent speed loss and suppress fuel consumption for reacceleration.

Round cockpit for enhanced safety and comfort.

Ergonomics were applied in the design of the layout of Quon's cockpit right down to the placement of buttons including ESCOT-V controls. The cockpit provides a wide, unobstructed view to enable drivers to concentrate without distraction. With a layout designed for easy accessibility and operation, it adds up to a safe and comfortable driving environment. The tall cabin and modern interior provide comfort that softens the fatigue of long-distance driving, for which constant concentration is a must.

Going the Extra Mile

4 reasons why UD Trucks is our brand of choice

“UD Trucks truly knows and understands our business.”

4 reasons why UD Trucks is our brand of choice

Extra Mile Stories

“Driving the UD trucks feels like I’m driving a car.”

1 Designed for drivers

We spend a lot of time on the road and I have driven many types of trucks. The ESCOT-V is not only easy to drive, it feels like I’m driving a car. Driving the ESCOT-V is so comfortable that even we drivers ask for it ourselves.

Mr. Sim Tiam Joo, Driver – Alligator Logistics Pte Ltd

“UD Trucks knows our trucks.”

2 Engineered low downtime

Having safe trucks is most important for our drivers. Each time we send our trucks back to UD Trucks, it takes them little time to come back with the UD Trucks workshop diagnosis and solutions. This is crucial as it affects our operations if our UD Trucks are not on the road quick enough. I can say that UD Trucks truly knows our trucks just like their own.

Mr. Eric Tan Kah Ming, Operations Manager – Alligator Logistics Pte Ltd

“Peace of mind to concentrate on our business.”

3 Built for lower costs

UD trucks save us money. Fuel consumption is lower compared to other brand of trucks. UD trucks are also designed for long hours of usage and low maintenance costs. Uptime for our UD trucks are as high as 90%. This saves operational costs for the company and ensures high productivity of our team. With UD Trucks, we can have a peace of mind to concentrate on what we do best serving our customers.

Mr. Robin Loh, Deputy Managing Director – Alligator Logistics Pte Ltd

“Even the drivers ask for UD trucks”

4 Branded for choice

Hiring new drivers is no easy feat these days. In our company we hire the best of the best. We understand the needs of our drivers and we believe a good reliable truck is important not only for productivity but most importantly for safety. UD Trucks provides us with the characteristics of a good truck and even the drivers asks for them!

Mr. Eric Tan Kah Ming, Operations Manager – Alligator Logistics Pte Ltd

Alligator Logistics started in 1994 as a family run business concentrating on its trucking services. Today we have grown from a family business to a group of companies offering holistic services integrating marine cargo-handling and logistical needs.

With our fleet of modern prime-movers, low beds and container trailers, we cater to different needs of the trade. Providing an integrated and holistic approach in shipping and logistical operations, we ensure our customers cost-efficiency, timeliness of deliveries and a peace of mind to concentrate on their core business. This is also the trust we have in UD Trucks. We have a peace of mind knowing that our trucks can ensure performance and cost efficiency.

Our fleet of UD trucks has grown with our business. Today, more than 50% of our fleet of prime movers are UD trucks. We are confident of the safety and high efficiency of these trucks. Even the drivers ask for them!

Mr. Robin Loh, Deputy Managing Director – Alligator Logistics Pte Ltd
